- **Back-End:** Microsoft SQL Server, ASP.net, C#, .Net Core, Web Services API.
- **CMS:** WordPress.
- **Management Systems:** Git, TFS.
- **Soft Skills:** problem solving, teamwork, work ethic.
- **Programming Languages**: C++, Python, PHP.
- **Others:** Machine Learning.

ABOUT

I started diving in this field since 2019. I started as front-end developer, I've learnt Html, CSS, JavaScript, Responsive design then learnt some of React.js library.
After that I had an opportunity to work as Back-end developer at Robotic Mind Company, where I worked as .Net developer.
Now, I am improving my skills in .Net Core and React.js.

EXPERIENCE

- **Back-End Web Developer:** Robotic Mind | Oct 2021 - Now
  - I began as a Back-end Developer using C#, ASP.net Web Form, and SQL. I also used APIs and web services then I used my front-end skills to develop full responsive websites.
  - I learnt about control management system as WordPress.
  - last couple months, I was promoted to be in charge of project management and intern training (git, TFS).
  - projects:
    - Marten Do (Asp.net).
    - Robotic Mind Portfolio (WordPress).
    - Al-Basheer-Iraq (Asp.net).
- **Laravel Developer:** Syrian Youth Assembly | 3 months, 2020.
  - I had an opportunity to volunteer with this company for three months, where I learnt some about PHP.
